

Rich Math Tasks & 5 Practices in Online Teaching

Presented by Theresa Wills, PhD

**Assistant Professor, Mathematics Education Leadership,
George Mason University**

Explore strategies to implement rich mathematical tasks and discussions in your synchronous online classroom. In this webinar, you will engage in interactive slides to complete a task. You will incorporate multiple representations such as using concrete, pictorial, and abstract. Then, all participants will engage in a math talk that utilizes the 5 practices. Learn how to transition your pedagogical practices into the online environment and keep your math class fun, interactive, collaborative, and rigorous.

Recommended Grade Level: K - Algebra 2
